

3D Printing (DDD, SSYS, XONE, VJET) It's Over

Date: February 5, 2014

On January 19, I [called the end of the 3D printing hysteria](#). Since then, Andrew Left at Citron put out another [short report on DDD](#), DDD warned and the entire space has crumbled. Here are the stock prices then versus today:

	<u>Price on 21-Jan-14</u>	<u>Price on 5-Feb-14</u>	<u>Holding Period Return</u>
DDD	\$89.00	\$56.40	36.6%
SSYS	\$123.00	\$104.10	15.4%
XONE	\$57.68	\$38.60	33.1%
VJET	\$40.38	\$31.39	22.3%

Dare I say candy did indeed mark the top?

P.S. These stocks are going lower. Much lower. But rallies will inevitably come so manage your positions like a professional.
